SUMMARY

I'm a software engineer specializing in mobile app development and AI integration. I help businesses and teams build scalable, user-friendly applications by combining real-time features, clean UI/UX, and smart backend systems. With experience in Flutter, Firebase, and Python-based AI tools, I've developed everything from chatbots to management platforms—delivering reliable, high-quality solutions that drive real impact.

WORK EXPERIENCE

Associate Software Engineer, Visiomate Python/AI Engineer - Built AI chatbots, email responders, and virtual assistants using OpenAI and prompt engineering. - Integrated AI with backend systems (Python, Flask, Django, REST APIs) for real-time, context-aware automation. - Developed a tool to scrape e-commerce product data (Selenium) and upload it to OpenAI Assistant's memory using Flask. - Optimized and developed multi-role Django web apps. - Skilled in Python, OpenAI API, and web scraping. - Fine-tuned AI behavior through custom prompts, improving response accuracy and task relevance.	Apr 2025 – present Lahore, Pakistan
Associate Software Engineer, Visiomate Flutter Developer - Developed mobile applications with features like audio players, search engines, multilingual support, and link launchers. - Implemented Firebase-based group notifications and integrated Google APIs for location-based features. - Worked on chat functionalities, including media sending, using Firebase Firestore and authentication. - Collaborated with the team to integrate third-party APIs and debugged app issues for optimal performance.	Mar 2024 – Apr 2025 Lahore, Pakistan
Associate Software Engineer, Visiomate ERP Developer Microsoft Dynamics 365	Dec 2023 – Mar 2024 Lahore, Pakistan
Internship in .NET Development, Visiomate Built CRUD APIs, integrated them with React, and managed databases with Microsoft SQL Server.	Aug 2023 – Dec 2024 Lahore, Pakistan

SKILLS

Languages – Python, Dart, C#, JavaScript, SQL | **Frameworks/Libraries** – Django, Flask, Flutter, .NET Core MVC, ReactJS | **Tools/Technologies** – OpenAI, Firebase, Git, Postman, Google Maps API, Prompt Engineering | **Soft Skills** – Excellent Communication, Troubleshooting, Problem-Solving, Team Management, Leadership, Decision Making

EDUCATION

BS Computer Science, UET Lahore Course: Programming Fundamentals, Object-oriented Programming, DSA, Database, Software Engineering, Artificial Intelligence, Mobile Application Development	2020 – 2024 Lahore, Pakistan
Associate Islamic Studies and Leadership, Naseeha Institute Course: Aqeedah, Jurisprudence, Exegesis, Hadith Sciences, Arabic Grammar, Fiqh of Dawah	Aug 2022 – present Lahore, Pakistan

PROJECTS

Bayan ul Quran, Flutter Mobile Application - Rebuilt an Islamic reference app from Kotlin to Flutter, improving maintainability and performance. - Developed features like audio recitation, Ayat search, multilingual support, and Tafseer lecture integration.	Dec 2024 – present
Flock App, Flutter Mobile App - Designed and built a discovery platform for kids' camps, sports, and activities with advanced filtering by location, age, provider, and ratings. - Implemented Firebase authentication, Firestore for real-time data, and push notifications. - Enabled features like favoriting, following, and reviewing camps and providers.	Oct 2024 – present
Dynamic Group Notification System, Flutter and Firebase Messaging - Engineered a grouped notification system for chat apps using Firebase Cloud Messaging and local notifications. - Grouped messages by chat ID, allowing expandable summaries and smooth user navigation.	Sep 2024 – Oct 2024
The Department Information and Management System(FYP), PostgreSQL, ExpressJS, NodeJS, ReactJS - Developed a full-stack web app to streamline internal departmental workflows. - Designed a normalized database schema and built RESTful APIs using Postman and pgAdmin.	May 2023 – Apr 2024
