Muhammad Ahmad

Backend-Focused Full-Stack Software Engineer

Lahore, Pakistan +92-322-7081621 ahmadrao17@gmail.com https://github.com/ahmadrao17

https://www.linkedin.com/in/ahmadrao17/

Profile

Software engineer with backend depth and practical full-stack delivery across compliance, events, and healthcare products. Build **Python/Django** APIs, asynchronous workflows, integrations, and **React/TypeScript** interfaces; use **AI-assisted** development to help ship functional frontend features. Lead features from requirements through production support, and participate in client discussions to understand needs and communicate solutions.

Skills

Backend & Data — **Python, Django, Django REST Framework, Flask, REST APIs, PostgreSQL, Redis, Celery, webhooks, third-party integrations**

Frontend & Product — **TypeScript, JavaScript, React, HTML/CSS, responsive UI, API integration, AI-assisted frontend development**

AI & Automation — **OpenAI API, RAG, vector stores, Selenium, web scraping, workflow automation**

Collaboration — **Client requirements, solution communication, feature ownership, cross-functional delivery, mentoring**

Additional — Flutter, Firebase, .NET Core, Git, Docker, WebSockets

Professional Experience

Software Engineer, *BarqDev* — Nov 2025 – Present, Lahore, Pakistan

- Lead features across GWG Platform, ATTDE, and SpexBot from requirements through release and production support.
- Participate in client meetings to clarify requirements, discuss technical approaches, and communicate solutions.
- Build Django/DRF APIs, Celery/Redis workflows, PostgreSQL data operations, React/TypeScript interfaces, WebSocket notifications, and third-party integrations.
- Improve GWG compliance/KYC workflows covering screening queues, contracting-party actions, beneficial-owner questions, dashboards, and dossier/form controls.
- Deliver ATTDE onboarding, organization and content workflows, and Stripe session/webhook fixes; maintain SpexBot Selenium automation across optical practice systems, EHRs, and insurers.
- Strengthen production reliability through batch processing, failure diagnostics, scraper recovery, duplicate prevention, monitoring, and automated notifications.
- Mentor newer engineers.

Associate Software Engineer, *Visiomate* — Dec 2023 – Nov 2025, Lahore, Pakistan

- Built AI chatbots, voice agents, email responders, and knowledge-base workflows using OpenAI APIs, Flask, and RAG techniques.
- Developed backend APIs, webhooks, and Odoo/third-party integrations for lead creation, support automation, and business workflows.
- Contributed to a Django ERP with multi-role access and operational workflows; built Flutter features including chat, Firebase notifications, Google APIs, and location services

Internship in .NET Development, *Visiomate* — Aug 2023 – Dec 2023, Lahore, Pakistan

- Built CRUD APIs, connected them to React interfaces, and worked with Microsoft SQL Server.

Education

BS Computer Science, *UET Lahore* — 2020 – 2024, Lahore, Pakistan

- **Course:** Programming Fundamentals, OOP, DSA, DB, Software Engineering, AI, Mobile Application

Associate Islamic Studies and Leadership, *Naseeha Institute* — Aug 2022 – present, Lahore, Pakistan

- **Course:** Aqeedah, Jurisprudence, Exegesis, Hadith Sciences, Arabic Grammar, Fiqh of Dawah

Languages

English — Proficient | **Urdu** — Native | **Arabic** — Basic

Projects

GWG Platform, *Compliance Workflows | Django, DRF, React, TypeScript, Celery, PostgreSQL, Docker*
- Multi-tenant Swiss AML platform for financial institutions and contracting parties, spanning onboarding, KYC dossiers, screening review, self-declarations, and official forms.
- Delivered Django/DRF and React/TypeScript features for role-specific review queues, AML dashboards, contracting-party actions, beneficial-owner questions, and dossier/form workflow controls.
- Worked within versioned, four-language questionnaire and form workflows requiring tenant isolation, permission checks, auditable document and submission states, and explicit review before binding submission.

SpexBot – Healthcare Automation Platform, Dec 2025 – Aug 2026
Django, DRF, Selenium, Celery, Redis, PostgreSQL, React, WebSockets
- Developed and maintained a large-scale automation platform integrating with **10+ US optical practice management systems, EHRs, and insurance providers**.
- Built and maintained Selenium-based automation for insurance claim retrieval, eligibility validation, claims processing, inventory synchronization, and order workflows.
- Designed and implemented end-to-end features including Wave Product Resync APIs, Contact Lens Mapping, PDF submission workflows, analytics stats improvements, and real-time notification systems.
- Improved automation reliability by implementing failure detection and notifying via email, batch processing, diagnostics, duplicate product prevention, and production monitoring, helping reduce operational interruptions and manual intervention.

ATTDE, *Events Platform | Django, Celery, PostgreSQL, Stripe, REST APIs*
Built onboarding and organization-owned content workflows; addressed Stripe webhook and checkout-session behavior.

Gaggle App, *Mobile Application* Oct 2024 – present
- Designed and built a **Flutter** application with advanced filtering capabilities by location, age, provider, and ratings.
- Implemented **Firebase** for authentication, real-time data storage with Firestore, and **push notifications**.
- Enabled core features such as favoriting, following, and reviewing providers.

Audio Quran, *iOS/Android Mobile Application* Mar 2025 – May 2025
- **Purpose:** A cross-platform mobile audio player for Quran recitations.
- Developed a **Flutter** app with **Firebase integration**, offering features like download, favorite, and repeat playback.
- Integrated **in-app purchase** functionality to generate revenue.

Bayan ul Quran, *iOS/Android Mobile Application* Dec 2024 – present
- Rebuilt an Islamic reference app from Kotlin to Flutter, improving maintainability and performance.
- Developed features like audio recitation, Ayat search, multilingual support, and Tafseer lecture integration.

AI Voice & Chat Support Agent – Fencing Company, *OpenAI Assistant API, ElevenLabs, Flask, Odoo API* Jun 2025 – Aug 2025
- Built an AI-powered **voice and chatbot agent** using OpenAI and ElevenLabs.
- Developed **Flask APIs** with Odoo integration to keep knowledge bases updated with product data.
- Applied OpenAI's **function calling** to automate lead creation and contact forms.

AI Chat Assistant – Nurtureful Psychology, *OpenAI API* Aug 2025 – Sep 2025
- Created a **chatbot assistant** to guide users through the website.
- Designed a **structured company profile** and integrated it with RAG for context-aware responses.

AI Course Test Generator – Webinar Platform, *OpenAI API, Flask* Aug 2025 – Aug 2025
- Developed an AI agent that generates **multiple-choice tests** from course materials.
- Built a **Flask API** to process uploaded files and return formatted **Excel files** with questions and answers.

AI Support Assistant, *Python, OpenAI Assistants API, vector stores*
Created reusable scripts for assistant setup, knowledge-file ingestion, instruction updates, and support-conversation tests.

Backend Social Feed API, *Django, DRF, django-filter*
Structured a social feed backend with users, content, permissions, serializers, and REST endpoints.

Leadership & Engagement

- Represented BarqDev as a technical team member at a recruitment drive; actively participate in company events.
- Captained a team during a company sports event, coordinating teammates and encouraging participation.
